MY JOB GROW
YOUR PERSONAL GROWTH CLASS

Date: 10/04/2025

To Whom It May Concern,

This is to certify that **Om Rajendra Bharambe ,** successfully completed a **2-months** Hybrid Internship Program with My Job Grow ending in **March** 2025, candidate has worked on a variety of complex problem statements and capstone projects that allowed them to apply and enhance their domain knowledge in the field of **Artificial Intelligence.**

As part of the program, they displayed remarkable dedication and professionalism while handling projects that required in-depth analysis, problem-solving skills, and innovative thinking.

Candidate has demonstrated proficiency in several key skills, including but not limited to:

Analytical Skills: Breaking down complex problems, interpreting data, and identifying key insights.

Technical Expertise: Applying domain-specific knowledge effectively, whether it be in programming, data analysis, or engineering design.

Project Management: Organizing tasks, meeting deadlines, and working on project phases from planning to execution.

Collaboration and Communication: Effectively working in teams, sharing ideas, and adapting to feedback for continuous improvement.

Critical Thinking and Problem Solving: Addressing challenges with creativity and finding solutions to real-world issues.

The key areas they focused on included domain knowledge of : -

- **AI Fundamentals in Cloud Computing:** Gaining an understanding of core AI concepts and how they integrate with cloud platforms to build scalable, distributed AI systems.
- **AI Data Processing & Analysis in the Cloud:** Learning essential skills to manage and analyze large-scale datasets in cloud environments for AI applications.
- **Cloud-Based AI Model Development & Evaluation:** Developing expertise in building machine learning, deep learning, and reinforcement learning models using cloud-based tools and platforms for AI solutions.
- **End-to-End AI Solution Development on the Cloud:** Combining cloud computing and AI expertise to create comprehensive, scalable AI systems and solutions.

Their efforts have positively impacted our projects, and we are confident that the skills they gained will greatly benefit them in their future career endeavors.

We wish the candidate all the best in their academic and professional pursuits.

Sincerely,
Bahzad Ali - Director
